

abirein[®]
for your health

**DISINFECTION IN THE
FOOD INDUSTRY THROUGH
ABIREIN[®]LIQUID**

**RELIABLE, EFFECTIVE, INEXPENSIVE, SAFE,
ENVIRONMENTALLY FRIENDLY AND FULLY BIOLOGICALLY DEGRADABLE**

**Abirein Liquid contains no alcohol, phosphates, tensides,
formaldehyde, fragrances, or colorants.**

ABIREIN LIQUID will kill

- bacteria,
- viruses,
- fungi and
- Algae

without the use of other chemicals.

ABIREIN LIQUID is harmless to

- human,
- animal,
- plant life.

ABIREIN LIQUID is environmentally friendly and fully biologically disintegrating.

Almost no other comparable technology is available which can equal **ABIREIN LIQUID** in effectiveness, versatility, and economic viability.

- **ABIREIN LIQUID** contains no alcohol, phosphates, tensides, formaldehyde, fragrances and colorants
- **ABIREIN LIQUID** conforms to the German environmental standards.

ABIREIN[®]LIQUID DISINFECTION IN THE FOOD INDUSTRY

USE OF ABIREIN LIQUID IN SLAUGHTERHOUSE AND MEAT STORAGE PLANTS

- **WORKS QUICKLY**
- **FULLY BIOLOGICAL DEGRADABLE**
- **PREVENTS BAD ODOURS**

To be used effectively to slow down the decaying process in slaughtered animal carcasses (cows, sheep, swine, fowl, or fish)

The oxidants contained in **ABIREIN LIQUID** are highly effective and destroy all known bacteria, fungi and microorganisms such as salmonella streptococci, E. Coli, MSRA, EHEC, TBC, HBV (Hepatitis), HIV. , etc

ABIREIN LIQUID can be applied through spraying before the meat is packed or frozen.

After a period of 30 seconds to 2 minutes, the meat can be packed or frozen.

A mixture of **ABIREIN LIQUID / WATER** 1:20 is recommended.

To transport fish, crustaceans, shellfish it is recommended that the ice cubes be made from a mixture of **ABIREIN LIQUID** 1:20 to 1:50.

The **ABIREIN LIQUID** contained in the ice cubes will protect the foodstuff even when melted so preventing spoilage.

ABIREIN LIQUID leaves no after-taste on the foodstuffs.

Storerooms, storage containers, refrigeration units (Trucks) and all objects, equipment, working surfaces and containers in food preparation and slaughter areas contaminated by dangerous and harmful bacteria can be effectively eradicated with a mixture of 1:20 or 1:50.

ABIREIN LIQUID can be used to prevent a build up of odours in drains and drainpipes.

Abirein Liquid Applications

- Disinfection of drinking water
- Disinfection of waste water
- Cleaning and disinfection of slaughterhouses
- Cleaning and disinfection of surfaces, walls, doors, floors and all institutional equipment etc
- Disinfection of fish markets
- Odour removal of fish markets
- Cleaning and disinfection of food preparation and supply areas
- Cleaning and disinfection of sanitary facilities
- Disinfection and cleaning in kitchens

ABIREIN LIQUID can be used undiluted or diluted with water, according to the degree of bacterial contamination and the required level of hygiene.

- Toilet facilities, urinals, waste bins can be disinfected and deodorized during the routine cleaning process using **ABIREIN LIQUID**
