

**abirein**<sup>®</sup>  
*for your health*

**ABIREIN<sup>®</sup>LIQUID IN  
VEGETABLE AND FRUIT  
FARMING**

**RELIABLE, EFFECTIVE, INEXPENSIVE, SAFE,  
ENVIRONMENTALLY FRIENDLY AND FULLY BIODEGRADABLE**

**Abirein Liquid contains no alcohol, phosphates, tensides,  
formaldehyde, fragrances, or colorants.**

## **ABIREIN<sup>®</sup> LIQUID IN VEGETABLE AND FRUIT FARMING**

### **THE USE OF ABIREIN LIQUID IN VEGETABLE FARMING AND HOT OR GREEN HOUSES**

**ABIREIN LIQUID** is environment friendly and a very effective disinfectant, killing bacteria (also multi resistant bacteria like EHEC or MSRA), virus, fungus and algae.

#### **Disinfecting the water in central irrigation systems:**

One litre of **ABIREIN LIQUID** diluted with 400 to 500 litres of water is an effective mixture. This disinfecting mixture will kill all harmful bacteria, fungus and algae within the irrigation system on plants, roots and in the soil.

**ABIREIN LIQUID** removes and prevents a build up of algae in the irrigation system

A mixture of **ABIREIN LIQUID** in the concentration of 1:400 to 1:500 can also protect the plants against fungal diseases.

**ABIREIN LIQUID** should be used at least once a week (or if needed in shorter cycles) in the irrigation system as the oxidants decrease (chlorine compounds)

### **PROLONGING THE SHELF LIFE OF FRUIT AND VEGETABLES**

The shelf life of fruit, vegetables or bunches of edible herbs can be prolonged after harvesting (before packaging), submerging or spraying the harvest with an **ABIREIN LIQUID / WATER mixture** of 1:10 to 1:50 to suit the bacterial contamination.

The same treatment applied to all kinds of **bulbs and seedlings** will help to prevent mould and fungus.

All micro organisms have to establish on the fruit surface completely new after the disinfectant treatment.

The harvest does not need to have a wash with water after a treatment with the **ABIREIN LIQUID / WATER** mixture as the product is fully, biological degradable.

This mixture has no after taste or smell as the active chlorine combinations evaporate.

**ABIREIN LIQUID** is free from alcohol, phosphates, tensides, and formaldehydes.
